

# RANJAN S

## Professional Summary

I am currently pursuing MCA at St. Philomena College, Puttur, after completing my B.Sc. in Computer Science from GFGC Bettampady. My areas of interest include Artificial Intelligence, Machine Learning, Computer Vision, and Natural Language Processing. I enjoy learning new technologies and exploring how intelligent systems can be used to solve real-world problems. Through academic projects and self-learning, I am continuously improving my technical knowledge and practical skills. I am particularly interested in gaining hands-on experience and expanding my understanding of AI-related technologies.

## Education

|                                                                                                               |             |
|---------------------------------------------------------------------------------------------------------------|-------------|
| <b>Master of Computer Applications (MCA),</b><br><i>St. Philomena College (Autonomous), Puttur</i>            | 2025 – 2027 |
| <b>Bachelor of Science (B.Sc.),</b> <i>Government First Grade College (GFGC), Bettampady</i><br>CGPA: 9.38/10 | 2022 – 2025 |

## Technical Skills

|                                                                                 |                                                                                             |
|---------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| <b>Programming</b><br>Python, Java, SQL                                         | <b>Databases</b><br>MongoDB, PostgreSQL                                                     |
| <b>Libraries &amp; Frameworks</b><br>NumPy, Pandas, TensorFlow, PyTorch, OpenCV | <b>Areas of Interest</b><br>Artificial Intelligence, Machine Learning, Computer Vision, NLP |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Online Shoe Shop Management System</b> <ul style="list-style-type: none"><li>Architected a web-based e-commerce platform mapping core business workflows for footwear sales, utilizing relational database management.</li><li>Designed and structured database schemas to handle product catalog management, dynamic inventory tracking, and seamless customer order flows.</li><li>Implemented an analytics module for transaction trend monitoring, executing efficient queries to handle data indexing and performance tracking.</li></ul> |
